KEY SOCIO-ECONOMIC STATISTICS ON IDB MEMBER COUNTRIES

STATISTICAL MONOGRAPH NO. 31

DATA RESOURCES AND STATISTICS DEPARTMENT
Rajab 1432H (June 2011)

ISSN 1658-4457

PREFACE

This 31st edition of the Statistical Monograph entitled “*Key Socio-Economic Statistics on IDB Member Countries*” presents data on major socio-economic indicators of member countries as well as aggregate statistics which are not always available in any other international statistical publications. Because of the importance of the indicators and period covered, this Monograph will enable users to monitor the progress and performance of member countries in achieving the targets and goals set out in various initiatives such as the Millennium Development Goals, the IDB 1440H Vision, and the OIC Ten-Year Programme of Action.

As in previous years, aggregate statistics are computed for four regional groupings and two economic groupings of IDB member countries, in addition to those for OIC economies, developing countries, least developed countries, high-income countries, and the world.

Over 200 indicators are featured in this Monograph, grouped under three main headings: Demographic and Human Development Indicators (Part I), Macro-economic Indicators (Part II) and External Sector Economic Indicators (Part III). Part I provides indicators on demography, population structure, vital statistic, health, education, poverty and human development, information and communication technology, employment, wage, productivity and competitiveness, environment, land use, food and agricultural production, which are used to assess progress in social and human development. Part II provides information on national accounts, government finance, inflation, money supply, and exchange rates and interest rate. National accounts data provide essential information on the economic performance in terms of growth and structure of output, investments, and savings. Part III provides indicators on external trade, balance of payments, external debt, and financial flows.

Data in this Monograph were sourced from the World Bank’s World Development Indicators online, IDB Data Platform, and online databases of several international institutions including the IMF, UNCTAD, FAO, UNDP, and OECD.

A team of staff in the Data Resource and Statistics Department, led by the Director, Dr. Abdullateef Bello, prepared the Monograph. The team members comprised Abdinasir Nur, Abu Camara, Thiekoro Doumbia, Mohamed S. El-Goussi and Abdul Rashid.

It is hoped that the Monograph will be useful to researchers and individuals interested in monitoring and studying the socio-economic development of IDB member countries.

Suggestions for improvement of this Monograph are most welcomed and should be sent to: datarsd@isdb.org.

Highlights

PART I: DEMOGRAPHIC AND HUMAN DEVELOPMENT TRENDS

1.1 Population

Approximately 1.6 billion people lived in the 56 member countries in 2010, and this figure is projected to reach 1.7 billion by 2015 if the prevailing demographic trends continue.

Asia (ASIA-8) region has the largest concentration of people (40 percent), followed by Middle East and North Africa (MENA-19) 28 percent, Sub-Saharan Africa (SSA-22) 27 percent and Countries in Transition (CIT-7) 5 percent. The most populous countries with excess of 100 million people are Indonesia (235 million), Pakistan (167 million), Bangladesh (165 million) and Nigeria (156 million). The Least Developed Member Countries (LDMCs) account for 29 percent while the Non-LDMCs represent 71 percent.

During the last decade, population of member countries grew at an average annual rate of 1.8 percent, with SSA-22 region having the highest population growth (2.4 percent), followed by MENA-19 (1.7 percent), ASIA-8 (1.4 percent), and CIT-7 (1.0 percent). The LDMCs averaged 2.0 percent as compared to 1.7 percent for Non-LDMCs. By contrast, the world population grew at an average annual rate of 1.2 percent compared with 1.4 percent in developing countries, and 0.5 percent in high-income countries.

At country level, Qatar's population, for example, more than tripled from 0.5 million in 1990 to 1.7 million in 2010, while those of Albania and Kazakhstan slightly decreased (from 3.3 million to 3.2 million, and from 16.3 million to 15.6 million, respectively). The number of people living in other countries in MENA-19 region increased sharply (including U.A.E., Bahrain and Jordan), but only slightly in countries in CIT-7 region (Azerbaijan and Kyrgyz Republic). Population also grew rapidly in a number of LDMCs including Palestine (107 percent from 1990 to 2010), Benin (101 percent), Yemen (98 percent), Gambia (92 percent), and Niger (85 percent) because of high fertility rates and increased life expectancy.

In 2009, the ratio of males to females in member countries as a whole was 102:100, with noticeable large differences among countries. In Qatar, U.A.E. and Bahrain males represented three-quarter, two-third and 57 percent of the population, respectively. On the other hand, Kazakhstan, Mozambique, Sierra-Leone, Azerbaijan, and Lebanon, among others, all had more females than males.

The average total dependency ratio in member countries was 64:100 in 2009, meaning that for every 100 people of working and productive age (15-64 years old) there were 64 people of non-working and non-productive age (young or old). Of the total dependency ratio, youth dependency accounted for 89 percent and old-age dependency for 11 percent. Youth dependency was the highest in SSA-22 (81:100), followed by ASIA-8 (51:100), MENA-19 (48:100), and CIT-7 (42:100). It varied from 19:100 in U.A.E. to 104:100 in Niger. In comparison, average youth dependency ratios in developing countries, high-income countries and the world were 45:100, 26:100 and 42:100, respectively.

1.2 Vital Statistics and Mortality

The average population density of member countries was 49 people per square kilometer in 2009 up from 34 people in 1990. Compared to developing countries (59 people per square kilometer) and the world (52 people), member countries as a group was less densely populated. However, there were disparities among member countries: Bangladesh, Bahrain, and Maldives

were the most densely populated member countries each had over 1,000 persons per square kilometer in 2009. On the other hand, Mauritania, Suriname and Libya were the least densely populated each with an average of 5 people per square kilometer. Asia region had the largest population density at 161 persons per square kilometer as against 114 persons in 1990.

Crude birth and death rates in member countries declined respectively to an average of 27 and 8 per 1,000 persons in 2009 from an average of 36 and 11 per 1,000 persons respectively in 1990. The natural growth of population—the difference between the crude birth rate and crude death rate—thus declined from 25 per 1,000 persons in 1990 to 19 per 1,000 persons in 2009.

Fertility rate, the number of children born to a woman by the end of her childbearing year, averaged 3 births per woman in member countries in 2009 down from 5 births per woman in 1990. Nine countries had fertility rates above 5 births per woman in 2009 (Niger, Mali, Afghanistan, Somalia, Uganda, Chad, Burkina Faso, Guinea-Bissau, and Nigeria). Sub-Saharan region had the highest fertility rate at 5 births per woman.

For every 1,000 live births in member countries, 71 died before reaching the age of 5 in 2009 as compared to an average of 121 per 1,000 live births in 1990. Only Cameroon recorded increase in under-5 mortality between 1990 and 2009. Whereas, the infant mortality rate for member countries averaged 50 per 1,000 live births in 2009 down from 82 per 1,000 live births in 1990.

1.3 Education

The adult literacy rate in member countries averaged 71 percent in 2009, with female literacy rate at 63 percent and male literacy rate at 78 percent. SSA-22 region had the lowest literacy rate averaging 57 percent, with female literacy rate at 46 percent and male literacy rate at 67 percent. At individual country level, literacy rate ranged from 26.2 percent in Mali to 99.7 percent in Kazakhstan and Tajikistan.

Males outnumbered females in most member countries in enrollments into primary and secondary schools. In ten member countries (Gambia, Senegal, Bangladesh, Mauritania, Uganda, Tunisia, Iran, Jordan, Brunei, and Kazakhstan), females' primary school enrollments exceeded males' while in 16 countries female's secondary enrollment exceeded their male counterparts (Algeria, Azerbaijan, Bahrain, Bangladesh, Brunei, Jordan, Kazakhstan, Kyrgyz Republic, Lebanon, Malaysia, Maldives, Palestine, Qatar, Saudi Arabia, Suriname, Tunisia, and U.A.E).

1.4 Health

In 2010, life expectancy in member countries averaged 65 years compared to 58 years in 1990—an increase of 7 years over 2 decades. People could expect to live longest in MENA-19 region (72 years), followed by ASIA-8 and CIT-7 regions (68 years). Average life expectancy of people living in Sub-Saharan member countries was the lowest at 52 years.

In 2009, member countries expended on average 4.9 percent of their total output (GDP) in health as compared to 4 percent in 2000. The share of health expenditure in individual member countries ranged from 2.3 percent of GDP in Turkmenistan to 13.1 percent in Sierra Leone. Public health expenditure averaged 56.4 percent of total health expenditure, as against 43.6 percent for private health expenditure. The average per capita health expenditure also increased from US\$161 in 2000 to US\$348 in 2009 with country level figures ranging from US\$18 in Guinea Bissau to US\$1,715 in Qatar.

As depicted in Figure 1 below, people live longest (above 75 years) in countries with the highest per capita health expenditures (Qatar, Bahrain, UAE, Kuwait and Brunei), but can also expect to live beyond 75 years in countries with higher average per capita health expenditure (Albania and Oman). Many countries in SSA-22 have both low per capita health expenditure and life

expectancy (below 60 years). Other countries (Kyrgyz Republic, Turkmenistan, Bangladesh, Pakistan, Syria, Indonesia, Egypt, Comoros, etc.) are characterized by low per capita health expenditures but with average to high life expectancy.

Access to basic health facilities such as safe water and sanitation increased generally across member countries. The percentage of population with access to safe water averaged 78 percent in 2008 while that with access to sanitation averaged 56 percent. At regional level, SSA-22 had the lowest percentage of population with access to safe water (61 percent) and sanitation (30 percent).

During 2000-2009, member countries on average had 0.8 physicians per 1,000 people with three countries having an average of 3 or more physicians per 1,000 people (Azerbaijan, Kazakhstan and Lebanon). Countries with the least number of physicians per 1,000 people were Mali, Guinea Bissau, Chad, Gambia, Somalia, Mozambique, Niger and Sierra Leone. Eight countries (Uzbekistan, Azerbaijan, Kazakhstan, Qatar, Libya, Kyrgyz Republic, Tajikistan, and Gabon) had 5 or more nurses per 1,000 people. Similarly, nine countries had 3 or more hospital beds per 1,000 people (Azerbaijan, Kazakhstan, Tajikistan, Kyrgyz Republic, Uzbekistan, Turkmenistan, Libya, Lebanon and Suriname).

1.5 Poverty and Human Development

The proportion of people in member countries living below the national poverty lines ranged from 3.8 percent in Malaysia to 66.4 percent in Sierra Leone during the period 2000-2010. In terms of \$1.25-a-day poverty line, ten countries had poverty rates of less than 2 percent (Malaysia, Kazakhstan, Jordan, Albania, Azerbaijan, Iran, Maldives, Syria, Kyrgyz Republic, and Egypt) with Nigeria having the highest poverty rate at 64.4 percent. At \$2-a-day, the poverty rate ranged from 1.5 percent in Kazakhstan to 83.9 percent in Nigeria.

In terms of human development index (HDI), SSA-22 appeared to be lagging behind with an average HDI of 0.375 in 2010 vis-à-vis the average benchmark of 0.516 for the member countries as a group. MENA-19 region appeared to have translated economic growth into human development (0.681), followed by CIT-7 (0.656) and ASIA-8 (0.570). LDMCs had an average HDI of 0.388 (below member countries' average) while Non-LDMCs 0.651.

Figure 2 shows the distribution of population size (in regional groupings) according to per capita income and human development in the most current year. It provides a clear picture of the level of welfare, human development and the population size in regional groupings.

1.6 Information and Communication Technology

The number of main telephone lines in member countries increased from an average of 5.4 per 100 people in 2000 to 8.6 per 100 people in 2009. Telephone subscribers increased more than eight folds from 8.3 per 100 people in 2000 to 68.5 in 2009. The number of cellular mobile telephone subscribers also substantially increased from 2.9 per 100 people in 2000 to 59.9 per 100 people in 2009.

In 2005-2008, member countries had an average of 5.2 personal computers per 100 people up from 1.5 in 2000, while the number of internet users increased dramatically averaging 15.2 per 100 people in 2009 compared to 1.3 per 100 people in 2000.

1.7 Science and Technology

Between 2000 and 2008, the number of researchers in R&D in member countries for which data were available, ranged from 8 (Niger) to 1,588 per million people (Tunisia).

Similarly, the number of technicians in R&D in member countries ranged from 10 (Niger) to 378 per million people (Egypt).

In 2009, high technology exports of member countries ranged from US\$ 0 (Benin, Burkina Faso, Gambia, Guinea, Iraq, Qatar, Togo and Yemen) to US\$51.6 billion (Malaysia). Patent applications filed by residents varied from 3 in Sudan to 5,970 in Iran.

1.8 Employment

Total labor force in member countries increased from 373 million in 1990 to 617 million in 2009, representing an average annual growth rate of 2.6 percent. Between 1990 and 2009, the average annual growth rate of labor force ranged from 0.2 percent in Albania to 6.9 percent in Qatar.

The sectoral distribution of labor force varied widely from one country or gender to another. In particular, during 2000-2009, the percentage of males in agriculture in total male employment ranged from 1.9 percent in Bahrain to 66.0 percent in Sierra Leone; and for females, it ranged from 0 percent in Qatar to 75.7 percent in Uganda.

In the same period, the percentage of male in industry in total male employment varied from 10.3 percent in Sierra Leone and Uganda to 48 percent in Qatar while that of females ranged from 1.8 percent in Saudi Arabia to 31.8 percent in Maldives. Similarly, the percentage of male in services sector in total male employment varied from 23.4 percent in Senegal to 82.4 percent in Oman, while that of females varied from 15.0 percent in Pakistan to 98.4 percent in Saudi Arabia.

1.9 Land Use and Environment

The share of arable land of member countries in total land area increased marginally by about 1 percentage point from 8.3 percent in 1990 to 9.3 percent in 2008. The permanent cropland also slightly increased from 1.4 percent of the total land area in 1990 to 1.6 percent in 2008. Non-agricultural land (i.e. others) accounted for the lion's share of the total land area at around 89 percent since 1990.

The share of forest area of member countries in total land area decreased from 15.2 percent in 1990 to 13.3 percent in 2010, and the average annual deforestation of the member countries averaged 0.45 percent per annum over the period 2000-2010.

The total carbon dioxide emissions of member countries increased significantly to 3,600 million metric tons in 2007 from 1,450 million metric tons in 1990. Similarly, the per capita carbon dioxide emissions increased from 2.2 metric tons in 1990 to 3.3 metric tons in 2007.

1.10 Food and Agricultural Production

In 2009, Indonesia (64.4 million metric tons) and Bangladesh (45.1 million metric tons) were the top-2 rice producing member countries. Together, they accounted for 80 percent of total member countries rice production that year. As for wheat, the top-3 producing member countries were Pakistan (24 million metric tons), Turkey (17.8 million metric tons) and Kazakhstan (12.5 million metric tons). Their production represented 56 percent of total member countries production. The top maize producer was Indonesia (with 17.6 million metric tons), representing 43 percent of total member countries production.

Agricultural and food production indices have generally increased. In particular, the agricultural production index for member countries as a group increased from 72.6 in 1990 to 121.9 in 2009 and the food production index increased from 72.3 in 1990 to 124.2 in 2009.

PART II: MACROECONOMIC TRENDS

2.1 Output Growth

At US\$2.4 trillion in 2009, real gross domestic product (GDP) of member countries as a group more than doubled in 20 years—from US\$1 trillion in 1990. In relative terms, it represented 6.1 percent of the world's real output and 24.8 percent of developing countries'. The eight largest economies were Turkey (US\$357.5 billion), Indonesia (US\$258.5 billion), Saudi Arabia (US\$250.4 billion), Iran (US\$158.1 billion), Egypt (US\$152.4 billion), Malaysia (US\$137.1 billion), U.A.E. (US\$117.8 billion), and Pakistan (US\$111.5 billion). Together, they accounted for about two-third of the total real output of member countries in 2009. Individually, the economies of Turkey, Indonesia and Saudi Arabia were larger than the combined output of LDMCs (US\$178.2 billion).

As depicted in Table A-1, average economic growth of member countries was 5.1 percent per year during the last decade as compared to 3.8 percent in the 1990s. In 1991-2000, five countries posted average yearly growth rates of 7 percent or more, while three economies experienced contractions. In comparison, eleven countries—most of them oil-producing—posted average yearly growth rates of 7 percent or more in 2001-2010, and no economy experienced contraction.

In the 1990s, non-oil-producing countries outperformed oil-producing ones (4.1 percent as against 3.8 percent). The situation was reversed during last decade when oil and/or gas producing countries benefited from rising oil and gas demand and prices. Many oil/gas producing countries

Table A-1: Distribution of Ten-Year Average Growth Performances

	1991-2000			2001-2010		
	Oil	Non-Oil	Total	Oil	Non-Oil	Total
7% or more	2	3	5	7	4	11
Between 5 and 7%	2	3	5	6	12	18
Between 3 and 5%	5	14	19	6	10	16
Between 0 and 3%	7	7	14	2	5	7
Negative	1	2	3	0	0	0

Table A-2: Distribution of Growth Performance during the last three years (2008-2010)

	2008			2009			2010		
	Oil	Non-Oil	Total	Oil	Non-Oil	Total	Oil	Non-Oil	Total
7% or more	6	8	14	4	3	7	6	3	9
Between 5 and 7%	5	13	18	1	4	5	5	7	12
Between 3 and 5%	4	6	10	6	13	19	6	17	23
Between 0 and 3%	6	4	10	5	6	11	5	4	9
Negative	1	1	2	6	6	12	0	1	1
Missing data	0	2	2	0	2	2	0	2	2
Total	22	34	56	22	34	56	22	34	56
Growth rate (%)	4.9	4.0	4.5	2.1	2.0	2.0	4.7	6.0	5.3

expanded their production capacities to satisfy global demand, and reaped the benefits of high oil and gas revenues.

Qatar's growth, for example, accelerated from an already impressive average of 8.4 percent per year in the 1990s to an average of 15.5 percent during last decade. Azerbaijan and Turkmenistan also posted extraordinary average growth rates of 17.5 and 12.1 percent per year in 2001-2010, respectively.

In 2009, in the midst of the global economic crisis, four oil-producing countries and three non-oil-producing countries posted growth rates of 7 percent or more (Table A-2). These were: Azerbaijan (9.3 percent), Qatar (8.6 percent), Uzbekistan (8.1 percent) and Nigeria (7 percent) for oil-producing countries; and Afghanistan (22.5 percent), Lebanon (9 percent) and Uganda (7.2 percent) for non-oil-producing countries.

As a whole, member countries recovered from the global economic crisis in 2010 with a real GDP growth rate of 5.3 percent as against 4.5 percent in 2008 and 2 percent in 2009. Only Kyrgyz Republic experienced economic contraction (-3.5 percent) despite improving global economy and rising gold prices. With the return of political stability and rising gold and commodity prices, Kyrgyz Republic's economic outlook is positive.

2.2 Per Capita Income

In 2010, the estimated average per capita GDP at purchasing power parity (PPP) was US\$5,143 in member countries. MENA-19 region had the highest per capita GDP PPP (US\$10,220), followed by CIT-7 (US\$6,094), ASIA-8 (US\$3,550) and SSA-22 (US\$1,931). Per capita output for the group of Non-LDMCs was US\$6,554 compared to US\$1,561 for the group of LDMCs.

At country level, Qatar had the highest per capita GDP PPP (US\$88,233), followed by Brunei (US\$47,200), Kuwait (US\$38,293), U.A.E. (US\$36,973), Bahrain (US\$26,808), Oman (US\$26,198) and Saudi Arabia (US\$23,743). On the other hand, Afghanistan, Mozambique, Togo, Sierra Leone and Niger, all had per capita GDP PPP below US\$1,000.

Qatar's fast growth during much of the last 20 years contributed to its tripling of per capita GDP PPP from US\$33,116 in 1990 to its current level. Other countries with equally impressive growth during 2001-2010, substantially increased their per capita output—it more than quadrupled in Azerbaijan (from US\$2,371 to US\$9,954) and more than tripled in Turkmenistan (from US\$1,906 to US\$6,597).

2.3 Structure of Output

The share of agriculture in member countries' GDP decreased from 17.4 percent in 1990 to 11.4 percent in 2009, while that of industry increased from 36.5 to 43.6 percent, and that of services decreased from 46.1 to 45 percent.

In 2009, agriculture's share in GDP ranged from 2.9 percent in Jordan and Saudi Arabia to 51.4 percent in Sierra Leone—the only country where it represented over 50 percent of GDP.

The top-6 countries where the share of industry accounted for over 50 percent of GDP in 2009 were Azerbaijan (60 percent), Algeria (54.5 percent), Gabon (53.8 percent), Turkmenistan (53.5 percent), Guinea (53 percent) and Saudi Arabia (50.6 percent). At country level, the share of industry in GDP in 2009 ranged from 12.1 percent in Comoros to 60 percent in Azerbaijan. Manufacturing sector in member countries as a whole represented 15.6 percent of GDP in 1990 and inched up slightly to 16.2 percent in 2007. Individual country shares ranged from 2.5 percent in Djibouti to 27.8 percent in Indonesia in 2009.

Services sector accounted for more than 50 percent of the GDP in 14 countries (Côte d'Ivoire, Bangladesh, Kazakhstan, Tajikistan, Pakistan, Morocco, Gambia, Albania, Senegal, Tunisia, Turkey, Jordan, Maldives, and Lebanon) in 2009. Individual country shares of services sector ranged from 26.6 percent of GDP in Sierra Leone to 78.2 percent in Lebanon.

2.4 Structure of Demand

The shares of household final consumption (i.e. private consumption) and general government consumption in the GDP of member countries both decreased, from an average of 61 percent in 1990 to 57 percent in 2008 of GDP and from an average of 16 percent in 1990 to 13 percent of GDP in 2008., respectively.

Gross domestic savings increased to an average of 34.2 percent of the GDP in 2008 from 23.2 percent in 1990. However, the share of gross capital formation (i.e. investment) remained stable at an average of 20-22 percent of the GDP since 2000.

The share of the exports of goods and services in the GDP of member countries increased from 29 percent in 1990 to 39 percent in 2008. Similarly, the average share of imports of goods and services in the GDP of member countries rose from 30 percent in 1990 to 33 percent in 2008.

2.5 Inflation, Money Supply and Exchange rate

Inflation rate, measured by consumer price index, in member countries inched up to an average of 7.1 percent in 2010 from 7.0 percent in 2009, but is well below last decade's average of 9.9 percent. The inflation rate in 2010 for individual countries varied from 0.5 percent in Afghanistan to 16.5 percent in Sierra Leone.

Changes in broad money supply (M2) in member countries have generally fluctuated since 1990. In 2009, most member countries recorded expansion in M2, which ranged from 1.1 percent in Chad to 33 percent in Afghanistan. Only Azerbaijan recorded a slight contraction in M2 (-0.3 percent). During the period 2000-2009, the average annual change in broad money supply varied from 3.3 percent in Guinea Bissau to 40.6 percent in Kazakhstan.

PART III: EXTERNAL SECTOR

3.1 External Trade

Although total exports of member countries decreased from \$2.1 billion in 2008 to \$1.9 billion in 2009 owing to the global economic crisis, member countries' share of world exports actually increased from 10.5 percent to 11.9 percent. MENA-19 region accounted for the lion's share with 69 percent, followed by ASIA-8 region (20 percent) while SSA-22 and CIT-7 regions represented only 6 percent each.

Merchandise --- mainly fuel (from MENA-19 and SSA-22 countries) and manufactures (from ASIA-8 countries) --- accounted for 72 percent of the goods and services exported in 2009. Exports remained highly concentrated to few goods as compared to the groups of developing and/or high-income countries. Member countries with most the most concentrated exports were Iraq, Guinea-Bissau, Chad, Azerbaijan, Nigeria, Maldives, Yemen, Sudan, Libya and Saudi Arabia. Countries with the most diversified exports were Turkey, Albania, Morocco, Indonesia and Tunisia.

The imports of goods and services of member countries decreased from US\$1.6 billion in 2008 to US\$1.5 billion in 2009, but actually increased as a share of world exports from 8.2 percent to 9.5 percent—just as in the case of exports. Again, MENA-19 region accounted for the lion's share of total imports in 2009 (64 percent), followed by ASIA-8 (22 percent). SSA-22 and CIT-7 represented 6 percent of total member countries' imports. Of the total goods and services imported, 80 percent were merchandise—mainly manufactures.

The aggregate terms of trade index, the price of exports relative to that of imports, for member countries improved steadily from 2002 to 2007, then dramatically in 2008. The index, which was mainly a reflection of terms of trade in Non-LDMCs, deteriorated rapidly in 2009 below the 2006 level. In LDMCs, terms of trade improved less dramatically between 2002 and 2007, and started deteriorating soon after 2007 (Figure 3).

Intra-IDB trade recorded an upward trend during the period 2005-2009. Indeed, intra-IDB merchandise exports as a percentage of total merchandise exports increased steadily from 13.4 percent in 2005 to 15.8 percent in 2009. Intra-IDB

merchandise imports as a share of total merchandise imports increased from 17.5 percent in 2005 to 19.1 percent in 2008, but dropped to 17.8 percent in 2009.

**Table 3: Exports concentration index
(Herfindahl-Hirschmann Index)
Top-10 and Bottom-5 Countries**

No.	Country	1995	2009
1	Iraq	0.758	0.968
2	Guinea-Bissau	0.525	0.926
3	Chad	0.722	0.871

54	Morocco	0.179	0.151
55	Albania	0.198	0.121
56	Turkey	0.112	0.083
**	IDB	0.455	0.455
**	Developing Countries	0.092	0.120
**	High-Income Countries	0.056	0.060

With regards to the direction of trade, the share of exports to industrial countries in total exports dropped from 53.5 percent in 2008 to 36.9 percent in 2009. Similarly, the shares of exports to oil-exporting countries and to non-oil developing countries slightly decreased from 6.9 to 5.6 percent and from 26.4 to 21.3 percent, respectively.

In terms of the direction of imports, the share of merchandise imports from industrial countries in total merchandise imports of member countries dropped from 94.5 percent in 2008 to 82.1 percent in 2009 while the share of imports from oil-exporting countries and that from non-oil developing countries also dropped from 14.5 to 10.3 percent and from 31.4 to 28.9 percent, respectively.

3.2 Balance of Payments and International Reserves

The current account of member countries varies widely from one country to another. In 2010, the current account balance for countries, for which data were available, ranged from US\$-38 billion in Turkey to US\$35.3 billion in Kuwait. At country level, 32 out of 54 countries for which data were available had current account deficit, while 22 countries had current account surplus.

The gross international reserves (including gold held by central banks) of member countries increased substantially from US\$ 68 billion in 1990 to US\$ 1.4 trillion in 2009. Thirty eight countries had more than US \$1 billion reserves each in 2009 with top-7 countries having excess of US\$50 billion reserves each (Saudi Arabia US\$409.7 billion, Algeria US\$149.3 billion, Libya US\$99.3 billion, Malaysia US\$95.5 billion, Iran US\$81.3 billion, Turkey US\$71 billion, and Indonesia 63.7 billion). The reserves of member countries ranged from US\$ 53 million in Guinea to US\$ 409.7 billion in Saudi Arabia. Individual country's reserves coverage of number of months of imports ranged from 0.6 months in Guinea to 56.4 months in Saudi Arabia in 2009. Fifteen countries had reserves that covered more than 10 months of imports in 2009.

3.3 External Debt

The total external debt of member countries increased steadily over the years reaching US\$902 billion in 2009 from US\$409 billion in 1990. Eleven member countries had no external debt, and for those that had external debt, the amount ranged from US\$ 0.3 billion in Comoros to US\$251.4 billion in Turkey in 2009. The top-3 countries with more than US\$100 billion external debts were Turkey, Indonesia and Kazakhstan. The debt-to-GNI ratio of member countries averaged 29.4 percent in 2009 while the debt-service-to-GNI ratio averaged 5.5 percent in the same year.

3.4 Financial Flows

The net resource flows (comprising net ODA, net other official flows and net private sector flows) to member countries decreased from US\$86.7 billion in 2008 to US\$ 66.2 billion in 2009. Twenty member countries received net resource flows of over US\$ 1 billion each in 2009 with Afghanistan topping the list (US\$6.1 billion), followed by Egypt (US\$6 billion) and Indonesia (US\$4.5 billion).

The share of concessional flows (official development assistance and official aid) in total net resource flows to member countries increased from an average of 46 percent in 2007 to 75 percent in 2008 and 86 percent in 2009. Only seventeen member countries received concessional flows above US\$1 billion each in 2009 namely Afghanistan, Pakistan, Nigeria, Iraq, Palestine, Bangladesh, Sudan, Uganda, Côte d'Ivoire, Mozambique, Burkina Faso, Morocco, Yemen, Mali, Turkey, Senegal, and Egypt.

The following twenty two member countries received more than US\$ 1 billion each in foreign direct investment in 2009: Saudi Arabia, Kazakhstan, Qatar, Turkey, Egypt, Nigeria, Indonesia,

Lebanon, U.A.E., Sudan, Iran, Algeria, Libya, Pakistan, Jordan, Oman, Tunisia, Syria, Malaysia, Turkmenistan, Morocco and Iraq.

Total net financing of IDB Group, up to the end of 1431H, amounted to US\$70.3 billion. Of this figure, US\$713 million were approved for Muslim communities in non-member countries.

The top-10 countries that received at least US\$ 2 billion each from IDB Group financing since inception were Bangladesh (US\$8.6 billion), Pakistan (US\$7.5 billion), Iran (US\$4.8 billion), Turkey (US\$4.7 billion), Saudi Arabia (US\$4.4 billion), Morocco (US\$4 billion), Egypt (US\$3.2 billion), Algeria (US\$2.5 billion), Indonesia (US\$2.3 billion) and Tunisia (US\$2.2 billion).

The composition of total net financing of IDB Group was as follows: Trade financing operations represented 53 percent, ordinary financing operations 46 percent (mainly through loans, leasing, and installment sale), while special assistance operations accounted for the remainder.

a. Refers to headcount ratio or proportion of the household (population) falling below the poverty line to total household (population)

b. A value of zero implies perfect equality while a value of 100 implies perfect inequality.

c. Data are for the latest year available.

**The Basic Capabilities Index (BCI) is an alternative way to monitor the situation of poverty in the world. It is the average of three indicators: 1) mortality among children under five, 2) reproductive or maternal-child health, and 3) education (measured by a combination of enrolment in primary education and the proportion of children reaching fifth grade).

a Measures the extent of deprivation, the proportion of people in the community who are left out of progress

TECHNICAL NOTE

TECHNICAL NOTE

A. AGGREGATION RULES

In calculating statistical aggregates, the following rules based on the World Bank's were used:

- Aggregate data for IDB are either totals or weighted averages.
- No aggregate values are calculated if missing data account for more than a third of the number of observations in a given year.
- Aggregates of ratios are calculated as weighted averages of the ratios using the value of the denominator as weight. Most often the average indicated for IDB is weighted according to the relative share of the countries in the group total for that indicator.
- Aggregate growth rates are calculated using exponential trend function. The resulting growth rates reflect trends that are not unduly influenced by exceptional values. Except where specifically noted growth rates of values are computed from constant price series.
- Aggregates for income groups (such as LDCs, High Income Countries, Developed countries, and the World) are taken directly from the data source, except for OIC countries and regional and economic groupings which were computed by the IDB staff.

B. REGIONAL AND ECONOMIC GROUPINGS

GLOSSARY

GLOSSARY

Adult literacy rate is the percentage of people ages 15 and above who can, with understanding, read and write a short, simple statement on their everyday life.

Agricultural raw materials (exports or imports) comprise crude materials except fuels excluding crude fertilizers and minerals excluding coal, petroleum, and precious stones, and metalliferous ores and scrap.

Arable land (in hectares) includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded.

Bank liquid reserves to bank assets ratio (%) is the ratio of domestic currency holdings and deposits with the monetary authorities to claims on other governments, nonfinancial public enterprises, the private sector, and other banking institutions.

Basic Capabilities Index (BCI) was designed by Social Watch as an alternative way to monitor the situation of poverty in the world. Most of the available poverty-measurements indicators are based on the premise that poverty is a monetary phenomenon and they measure, for example, how many persons live with an income of under one dollar a day. The BCI, like other alternative (non-monetary) ways of measuring poverty, is based instead on a person's capability of accessing a series of services that are indispensable for survival and human dignity. The indicators that make up the BCI are among the most basic of those used to measure the Millennium Development Goals.

Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring.

Cash surplus/deficit (% of GDP) is revenue (including grants) minus expense, minus net acquisition of nonfinancial assets.

Concentration index also named Herfindahl-Hirschmann index, is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration).

Consumer Price Index shows changes (inflation) in the cost of acquisition of a basket of goods and services purchased by the average consumer.

Crude death rate indicates the number of deaths occurring during the year, per 1,000 population estimated at midyear.

Current account balance (BoP) is the sum of net exports of goods, services, net income, and net current transfers.

Deposit interest rate (%) is the rate paid by commercial or similar banks for demand, time, or savings deposits.

Diversification index signals whether the structure of exports or imports by product of a given country or group of countries differ from the structure of product of the world. This index that ranges from 0 to 1 reveals the extent of the differences between the structure of trade of the country or country group and the world average. The index value closer to 1 indicates a bigger difference from the world average.

Domestic credit provided by banking sector (% of GDP) includes all credit to various sectors on a gross basis, with the exception of credit to the central government, which is net. The banking sector includes monetary authorities and deposit money banks, as well as other banking institutions where data are available (including institutions that do not accept transferable deposits but do incur such liabilities as time and savings deposits).

Domestic credit to private sector refers to financial resources provided to the private sector, such as through loans, purchases of nonequity securities, and trade credits and other accounts receivable, that establish a claim for repayment. For some countries these claims include credit to public enterprises.

Expenditures for research and development are current and capital expenditures (both public and private) on creative work undertaken systematically to increase knowledge, including knowledge of humanity, culture, and society, and the use of knowledge for new applications. R&D covers basic research, applied research, and experimental development.

Expense (% of GDP) is cash payments for operating activities of the government in providing goods and services. It includes compensation of employees (such as wages and salaries), interest and subsidies, grants, social benefits, and other expenses such as rent and dividends.

Exports of goods and services represent the value of all goods and other market services provided to the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments. Data are in current U.S. dollars.

External debt stocks, total is debt owed to nonresidents repayable in foreign currency, goods, or services. It is the sum of public, publicly guaranteed, and private nonguaranteed long-term debt, short-term debt, and use of IMF credit.

Food (exports or imports) comprise food and live animals, beverages and tobacco, and animal and vegetable oils and fats, and oil seeds, oil nuts, and oil kernels.

Food production index covers food crops that are considered edible and that contain nutrients. Coffee and tea are excluded because, although edible, they have no nutritive value.

Foreign direct investment is net inflows of investment to acquire a lasting management interest (10 percent or more of voting stock) in an enterprise operating in an economy other than that of the investor. It is the sum of equity capital, reinvestment of earnings, other long-term capital, and short-term capital as shown in the balance of payments.

Forest area is land under natural or planted stands of trees of at least 5 meters in situ, whether productive or not, and excludes tree stands in agricultural production systems (for example, in fruit plantations and agroforestry systems) and trees in urban parks and gardens.

Fuels (exports or imports) comprise mineral fuels.

GDP (constant 2000) is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant 2000 U.S. dollars. Dollar figures for GDP are converted from domestic currencies using 2000 official exchange rates.

GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars. Dollar figures for GDP are converted from domestic currencies using single year official exchange rates.

GDP per capita (constant 2000 US\$) GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in constant U.S. dollars.

GDP PPP per capita is gross domestic product converted to international dollars using purchasing power parity rates divided by midyear population.

General government final consumption expenditure (% of GDP) (formerly general government consumption) includes all government current expenditures for purchases of goods and services (including compensation of employees). It also includes most expenditures on national defense and security, but excludes government military expenditures that are part of government capital formation.

General government final consumption expenditure (annual % growth) Annual percentage growth of general government final consumption expenditure based on constant local currency.

GINI Index measures the extent to which the distribution of income (or, in some cases, consumption expenditure) among individuals or households within an economy deviates from a perfectly equal distribution. A Lorenz curve plots the cumulative percentages of total income received against the cumulative number of recipients, starting with the poorest individual or household. The Gini index measures the area between the Lorenz curve and a hypothetical line of absolute equality, expressed as a percentage of the maximum area under the line. Thus a Gini index of 0 represents perfect equality, while an index of 100 implies perfect inequality.

Global Competitiveness Index (GCI) is based on 12 pillars of competitiveness, providing a comprehensive picture of the competitiveness landscape in countries around the world at all stages of development. The pillars are: institutions, infrastructure, macroeconomic environment, health and primary education, higher education and training, goods market efficiency, labour market efficiency, financial market development, technological readiness, market size, business sophistication, and innovation.

GNI (formerly GNP), Atlas method is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. To smooth fluctuations in prices and exchange rates, a special Atlas method of conversion is used by the World Bank.

GNI (formerly GNP) per capita, Atlas method is the gross national income, converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population.

Goods exports (BoP) refer to all movable goods (including nonmonetary gold) involved in a change of ownership from residents to nonresidents. The category includes goods previously included in services: goods received or sent for processing and their subsequent export or import in the form of processed goods, repairs on goods, and goods procured in ports by carriers.

Goods imports (BoP) refer to all movable goods (including nonmonetary gold) involved in a change of ownership from nonresidents to residents. The category includes goods previously included in services: goods received or sent for processing and their subsequent export or import in the form of processed goods, repairs on goods, and goods procured in ports by carriers.

Gross capital formation (% of GDP) (formerly gross domestic investment) consists of outlays on additions to the fixed assets of the economy plus net changes in the level of inventories. Fixed assets include land improvements (fences, ditches, drains, and so on); plant, machinery, and equipment purchases; and the construction of roads, railways, and the like, including schools, offices, hospitals, private residential dwellings, and commercial and industrial buildings. Inventories are stocks of goods held by firms to meet temporary or unexpected fluctuations in production or sales, and “work in progress.”

Gross capital formation (annual % growth) Annual growth rate of gross capital formation based on constant local currency.

Gross domestic product, deflator (Index) is derived by dividing current price GDP by constant price GDP and is considered to be an alternate measure of inflation.

Gross domestic savings are calculated as GDP less final consumption expenditure (total consumption).

Growth of Real GDP is the percentage change of the constant price of GDP.

High-technology exports are products with high R&D intensity, such as in aerospace, computers, pharmaceuticals, scientific instruments, and electrical machinery. Data are in current U.S. dollars.

Hospital beds include inpatient beds available in public, private, general, and specialized hospitals and rehabilitation centers. In most cases, beds for both acute and chronic care are included.

Household final consumption expenditure (annual % growth) Annual percentage growth of household final consumption expenditure based on constant local currency.

Household final consumption expenditure, etc. (% of GDP) (formerly private consumption) is the market value of all goods and services, including durable products (such as cars, washing machines, and home computers), purchased by households. It excludes purchases of dwellings but includes imputed rent for owner-occupied dwellings. It also includes payments and fees to governments to obtain permits and licenses. Here, household consumption expenditure includes the expenditures of nonprofit institutions serving households, even when reported separately by the country.

Human Development Index (HDI) is a comparative measure of life expectancy, literacy, education and standards of living for countries worldwide. It is a standard means of measuring well-being, especially child welfare. It is used to distinguish whether the country is a developed, a developing or an under-developed country, and also to measure the impact of economic policies on quality of life.

Imports of goods and services represent the value of all goods and other market services received from the rest of the world. They include the value of merchandise, freight, insurance, transport, travel, royalties, license fees, and

other services, such as communication, construction, financial, information, business, personal, and government services. They exclude compensation of employees and investment income (formerly called factor services) and transfer payments.

Infant mortality rate is the number of infants dying before reaching one year of age, per 1,000 live births in a given year.

Inflation as measured by the consumer price index reflects the annual percentage change in the cost to the average consumer of acquiring a basket of goods and services that may be fixed or changed at specified intervals, such as yearly.

Interest rate spread is the interest rate charged by banks on loans to prime customers minus the interest rate paid by commercial or similar banks for demand, time, or savings deposits.

International reserves in months of imports are the reserve stock of the year, divided by the average monthly merchandise imports of the current year.

International reserves including gold consist of the sum of the country's foreign exchange, its reserve position in the IMF, the U.S. dollar value of SDR (special drawing rights) holdings by its monetary authorities and its reserves in monetary gold.

Internet users: are people with access to the worldwide network.

Investment in telecom projects with private participation covers infrastructure projects in telecommunications that have reached financial closure and directly or indirectly serve the public. Movable assets are excluded. The types of projects included are operations and management contracts, operations and management contracts with major capital expenditure, greenfield projects (in which a private entity or a public-private joint venture builds and operates a new facility), and divestitures. Investment commitments are the sum of investments in facilities and investments in government assets.

Lending interest rate (%) is the rate charged by banks on loans to prime customers.

Life expectancy at birth indicates the number of years a newborn infant is expected to live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life.

Life time risk of maternal death is the probability that a 15-year-old female will die eventually from a maternal cause assuming that current levels of fertility and mortality (including maternal mortality) do not change in the future, taking into account competing causes of death.

Liquid liabilities (M3) are the sum of currency and deposits in the central bank (M0), plus transferable deposits and electronic currency (M1), plus time and savings deposits, foreign currency transferable deposits, certificates of deposit, and securities repurchase agreements (M2), plus travelers checks, foreign currency time deposits, commercial paper, and shares of mutual funds or market funds held by residents.

Manufactures (exports or imports) comprise chemicals, basic manufactures, machinery and transport equipment, and miscellaneous manufactured goods, excluding non-ferrous metals.

Maternal mortality rate is the number of deaths of women from pregnancy-related causes per 100,000 live births in a given year.

Merchandise exports show the f.o.b. value of goods provided to the rest of the world valued in U.S. dollars.

Merchandise imports show the c.i.f. value of goods received from the rest of the world valued in U.S. dollars.

Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service using cellular technology, which provide access to the public switched telephone network. Post-paid and prepaid subscriptions are included.

Money and quasi money (M2) comprise the sum of currency outside banks, demand deposits other than those of the central government, and the time, savings, and foreign currency deposits of resident sectors other than the central government.

Money Supply (M1) is the sum of currency outside banks and demand deposits other than those of central government.

National poverty rate is the percentage of the population living below the national poverty line. National estimates are based on population-weighted subgroup estimates from household surveys.

Net current transfers (BoP) are recorded in the balance of payments whenever an economy provides or receives goods, services, income, or financial items without a quid pro quo. All transfers not considered to be capital are current.

Net enrollment ratio (primary) is the ratio of children of official school age based on the International Standard Classification of Education 1997 who are enrolled in school to the population of the corresponding official school age. Primary education provides children with basic reading, writing, and mathematics skills along with an elementary understanding of such subjects as history, geography, natural science, social science, art, and music.

Net enrollment ratio (secondary) is the ratio of children of official school age based on the International Standard Classification of Education 1997 who are enrolled in school to the population of the corresponding official school age. Secondary education completes the provision of basic education that began at the primary level, and aims at laying the foundations for lifelong learning and human development, by offering more subject- or skill-oriented instruction using more specialized teachers.

Net income (BoP) refers to receipts and payments of employee compensation paid to nonresident workers and investment income (receipts and payments on direct investment, portfolio investment, other investments, and receipts on reserve assets). Income derived from the use of intangible assets is recorded under business services.

Nurses and midwives include professional nurses, professional midwives, auxiliary nurses, auxiliary midwives, enrolled nurses, enrolled midwives and other associated personnel, such as dental nurses and primary care nurses.

OCR is Ordinary Capital Resources

Official Development Assistance commitment is a firm written obligation by a government or official agency, backed by the appropriation or availability of the necessary funds, to provide resources of a specified amount under specified financial terms and conditions and for specified purposes for the benefit of a recipient country or a multilateral agency.

Official exchange rate (LCU per US\$, end of period) refers to the exchange rate determined by national authorities or to the rate determined in the legally sanctioned exchange market. It is calculated at the end of period (local currency units relative to the U.S. dollar).

OIC - Organization of the Islamic Conference is an inter-governmental organization comprising 57 countries (Guyana and the 56 IDB member countries). OIC was established in pursuance of a decision taken during the First Summit Conference of Muslim Heads of State, held in Rabat (Morocco) in 1389H (1969). Its objective is to promote Islamic solidarity and cooperation.

Ores and metals (exports or imports) comprise crude fertilizer, minerals ores; metalliferous ores, scrap and non-ferrous metals.

Patent applications are worldwide patent applications filed through the Patent Cooperation Treaty procedure or with a national patent office for exclusive rights for an invention--a product or process that provides a new way of doing something or offers a new technical solution to a problem. A patent provides protection for the invention to the owner of the patent for a limited period, generally 20 years.

Personal computers: are self-contained computers designed to be used by a single individual, per 1,000 people.

Physicians are defined as graduates of any facility or school of medicine who are working in the country in any medical field (practice, teaching, research).

Population below \$1.25 a day is the percentage of the population living on less than \$1.25 a day at 2005 international prices.

Population below \$2 a day is the percentage of the population living on less than \$2.00 a day at 2005 international prices.

Population density is midyear population divided by land area in square kilometers.

Population with access to safe drinking water is the percentage of the population with reasonable access to an adequate amount of safe drinking water (including treated surface and untreated water from protected springs, boreholes, and sanitary wells).

Population with access to sanitation is the percentage of the population with at least adequate excreta disposal facilities that can effectively prevent human, animal, and insect contact with excreta.

Poverty gap is the mean shortfall from the poverty line (counting the nonpoor as having zero shortfall), expressed as a percentage of the poverty line. This measure reflects the depth of poverty as well as its incidence.

PPP conversion factor (GDP) to market exchange rate ratio is the number of units of a country's currency required to buy the same amount of goods and services in the domestic market as a U.S. dollar would buy in the United States. The ratio of PPP conversion factor to market exchange rate is the result obtained by dividing the PPP conversion factor by the market exchange rate. The ratio, also referred to as the national price level, makes it possible to compare the cost of the bundle of goods that make up gross domestic product (GDP) across countries. It tells how many dollars are needed to buy a dollar's worth of goods in the country as compared to the United States.

PPP conversion factor, GDP (LCU per international \$) is the number of units of a country's currency required to buy the same amounts of goods and services in the domestic market as U.S. dollar would buy in the United States. This conversion factor is for GDP.

PPP GDP is gross domestic product converted to international dollars using purchasing power parity rates. An international dollar has the same purchasing power over GDP as the U.S. dollar has in the United States.

Present value of external debt (% of exports of goods, services and income) is the present value of external debt divided by a three-year average of exports.

Present value of external debt (% of GNI) is the present value of external debt divided by a three-year average of GNI.

Present value of external debt is the sum of short-term external debt plus the discounted sum of total debt service payments due on public, publicly guaranteed, and private nonguaranteed long-term external debt over the life of existing loans.

Private health expenditure includes direct household (out-of-pocket) spending, private insurance, charitable donations, and direct service payments by private corporations.

Public health expenditure consists of recurrent and capital spending from government (central and local) budgets, external borrowings and grants (including donations from international agencies and nongovernmental organizations), and social (or compulsory) health insurance funds.

Quasi-liquid liabilities (% of GDP) are equal the M3 money supply less transferable deposits and electronic currency (M1).

Real effective exchange rate index (2005 = 100) is the nominal effective exchange rate (a measure of the value of a currency against a weighted average of several foreign currencies) divided by a price deflator or index of costs.

Real interest rate (%) is the lending interest rate adjusted for inflation as measured by the GDP deflator.

Researchers in R&D are professionals engaged in the conception or creation of new knowledge, products, processes, methods, or systems and in the management of the projects concerned. Postgraduate PhD students (ISCED97 level 6) engaged in R&D are included.

Revenue, excluding grants (% of GDP) is cash receipts from taxes, social contributions, and other revenues such as fines, fees, rent, and income from property or sales. Grants are also considered as revenue but are excluded here.

Risk premium on lending (prime rate minus treasury bill rate, %) is the interest rate charged by banks on loans to prime private sector customers minus the "risk free" treasury bill interest rate at which short-term government securities are issued or traded in the market.

Scientific and technical journal articles refer to the number of scientific and engineering articles published in the following fields: physics, biology, chemistry, mathematics, clinical medicine, biomedical research, engineering and technology, and earth and space sciences.

Tariff rate, applied, simple mean, all products (%) is the unweighted average of effectively applied rates for all products subject to tariffs calculated for all traded goods.

Tariff rate, applied, simple mean, manufactured products (%) is the unweighted average of effectively applied rates for all products subject to tariffs calculated for all traded goods. Manufactured products are commodities classified in SITC revision 3 sections 5-8 excluding division 68.

Tariff rate, applied, simple mean, primary products (%) is the unweighted average of effectively applied rates for all products subject to tariffs calculated for all traded goods. Primary products are commodities classified in SITC revision 3 sections 0-4 plus division 68 (nonferrous metals).

Tariff rate, applied, weighted mean, all products (%) is the average of effectively applied rates weighted by the product import shares corresponding to each partner country.

Tariff rate, applied, weighted mean, manufactured products (%) is the average of effectively applied rates weighted by the product import shares corresponding to each partner country. Manufactured products are commodities classified in SITC revision 3 sections 5-8 excluding division 68.

Tariff rate, applied, weighted mean, primary products (%) is the average of effectively applied rates weighted by the product import shares corresponding to each partner country. Primary products are commodities classified in SITC revision 3 sections 0-4 plus division 68 (nonferrous metals).

Technicians in R&D and equivalent staff are people whose main tasks require technical knowledge and experience in engineering, physical and life sciences (technicians), or social sciences and humanities (equivalent staff). They participate in R&D by performing scientific and technical tasks involving the application of concepts and operational methods, normally under the supervision of researchers.

Telephone lines are fixed telephone lines that connect a subscriber's terminal equipment to the public switched telephone network and that have a port on a telephone exchange. Integrated services digital network channels and fixed wireless subscribers are included.

Terms of trade is the ratio of the export unit value index to the import unit value index.

Total debt service (% of exports of goods, services and income) is total debt service to exports of goods, services and income.

Total debt service (% of GNI) is total debt service to gross national income.

Total debt service is the sum of principal repayments and interest actually paid in foreign currency, goods, or services on long-term debt, interest paid on short-term debt, and repayments (repurchases and charges) to the IMF.

Total enrollment is the number of pupils of the school-age group for primary education, enrolled either in primary or secondary education, expressed as a percentage of the total population in that age group.

Total fertility rate represents the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with current age-specific fertility rates.

Total health expenditure is the sum of public and private health expenditure. It covers the provision of health services (preventive and curative), family planning activities, nutrition activities, and emergency aid designated for health but does not include provision of water and sanitation.

Total labour force comprises people ages 15 and older who meet the International Labour Organization definition of the economically active population: all people who supply labor for the production of goods and services during a specified period. It includes both the employed and the unemployed. While national practices vary in the treatment of such groups as the armed forces and seasonal or part-time workers, in general the labor force includes the armed forces, the unemployed, and first-time job-seekers, but excludes homemakers and other unpaid caregivers and workers in the informal sector.

Total population is the number of people living in a country regardless of legal status or citizenship--except for refugees not permanently settled in the country of asylum, who are generally considered part of the population of their country of origin.

Trademark applications filed are applications to register a trademark with a national or regional Intellectual Property (IP) office. A trademark is a distinctive sign which identifies certain goods or services as those produced or provided by a specific person or enterprise. A trademark provides protection to the owner of the mark by

ensuring the exclusive right to use it to identify goods or services, or to authorize another to use it in return for payment. The period of protection varies, but a trademark can be renewed indefinitely beyond the time limit on payment of additional fees.

Under-5 mortality rate is the probability that a newborn baby will die before reaching age five, if subject to current age-specific mortality rates. The probability is expressed as a rate per 1,000.

Islamic Development Bank
