# Conservative Risk Management

## Risk Management Controls

- Exposure limits are determined by the Risk Management Department
- The Treasury Department and the business units each have risk management functions that manage and control the exposures in the respective businesses

## Credit Risk

- Preferred creditor status on sovereign financing:
  - 96.2% of all financing, excluding equity investments, is sovereign guaranteed
  - Remaining exposure to public private partnerships typically with elements of sovereign support
- Exposure to member countries is diversified with a view to avoid excessive concentration of risk. IsDB has established exposure limits for each country.

## Liquidity Risk

- Conservative approach to liquidity management; IsDB maintains sufficient liquidity levels to fulfill all commitments for a period of 24 months under a normal market scenario and 12 months under stress scenario
- IsDB's policy with regards to liquidity management requires IsDB to hold substantial liquid assets, which include cash, cash equivalents, commodity Murabaha placements and Murabaha financing with short-term maturity of 3-12 months

## Currency Risk

- Investment portfolio is held in currencies in line with the Islamic Dinar (ID)<sup>1</sup> basket currency which provides a natural currency hedge (consists of US\$: 43.38%, EUR: 29.31%, GBP: 7.44%, JPY: 7.59%, RMB: 12.28% as of December 31, 2024)
- All of IsDB's financing operations are denominated in the component currencies of ID. IsDB does not trade in currencies

## Interest Rate Risk

- IsDB endeavors to minimise rate mismatches in liabilities and financing portfolio
- IsDB utilises Shariah-compatible hedging to mitigate any mismatches

1. IsDB's unit of account is as follows: 1 Islamic Dinar = 1 Special Drawing Right of the IMF. Exchange rate of 1ID=US\$1.30413 for the year ended 31 December 2024

# Prudent Investment Management of Treasury Portfolio

Treasury Department manages more than US\$ 13.6 bn of Funds

1. Money Market Placements = Commodity Murabaha Placements + Cash and Cash Equivalents

2. Short-Term Trade Financing = Murabaha Financing with maturities of <6 months

A

## Money Market Placements<sup>1</sup>

- Money market placements comprise about 57% of total treasury investment portfolio:
  - Minimum rating of single 'A' for non-member country FIs
  - For placements with member country FIs, at least 97.5% of exposure is to institutions rated "BBB+" or higher
  - Conservative country and entity limits

B

## Marketable Securities

- Conservative approach to investments in marketable securities to better manage overall portfolio risk:
  - Investment grade for corporate papers
  - Selective approach for sovereign investments
  - Total size not to exceed 10% of total issuance

C

## Short Term Trade Financing<sup>2</sup>

- Similarly, IsDB maintains a prudent strategy for its short-term trade financing portfolio:
  - Mainly focused on member countries
  - Non-member countries are required to provide sovereign guarantees in order to avail trade financing
  - Total size of Murabaha financing does not exceed US\$ 1.0 bn

### Islamic Development Bank (IsDB) Sustainable Finance Framework

November 05, 2019

The Islamic Development Bank (IsDB) is a multilateral development financing institution with 57 member countries (MCs) with significant Muslim communities. As a multilateral development bank aiming to advance the SDGs, it provides a solid foundation for the issuance of green and sustainability sukuk.

The projects that can be financed under this sustainable finance framework are broadly defined and can include fossil fuel elements in nearly all project categories. However, the framework excludes, e.g., direct investments in fossil fuel extraction, production and transport, new and existing fossil fuel power plants (e.g., natural gas, combined cycle), roads, large hydropower (>25MW), new landfill construction or expansion, heavy duty vehicles or bunker fueled shipping, deforestation, expansion of livestock production and palm oil plantations. Proceeds finance or refinance projects within green and social categories in all of IsDB’s MCs. Green eligible project categories are renewable energy, clean transportation, energy efficiency, pollution prevention and control, environmentally sustainable management of natural living resources and land use and sustainable water and wastewater management. Social categories include employment generation / SME Financing, affordable housing, affordable basic infrastructure, access to essential services and socioeconomic advancement and empowerment.

IsDB provides a sound governance structure that includes a two-step project selection process including environmental and social screening procedures as well as climate resilience assessments, despite a lack of activity level emissions reporting and targets. Reporting for the sustainability and green sukuk will be conducted on a project-by-project level and an external review of the impact reporting will be published. However, more progress oriented impact metrics would substantially improve this framework in addition to also reporting on environmental indicators for all social projects financed and vice versa.

The social project categories aim at development of IsDB’s MCs in a socially sustainable fashion, but would benefit from targeting audiences to ensure equal access. The issuer demonstrates a strong drive to facilitate economic development, while taking into consideration the trade-off between green growth and economic development. However, the strong focus on economic development results in a broad categorization of target audiences for social development. The lack of detailed definitions of marginalized, vulnerable and poor target populations benefitting from this framework risks unequal access to infrastructure and
