Alignment Summary

Aligned = ✓ Conceptually aligned = ○ Not aligned = ✗

- ✓ Social Bond Principles, ICMA, 2025
- ✓ Green Bond Principles, ICMA, 2025
- ✓ Sustainability Bond Guidelines ICMA, 2021

See [Alignment Assessment](#) for more detail.

Strengths

Eligible projects aim to address a range of social and environmental issues in the Islamic Development Bank's (IsDB) member countries and in Muslim communities in non-member countries. Some projects could mitigate the environmental and climate impacts of infrastructure, utilities, and economic activities in the areas in which they are implemented. Social projects aim to improve access to essential services, infrastructure, and housing, while also addressing socioeconomic disparities.

Weaknesses

No weaknesses to report.

Areas to watch

IsDB will start implementing its approach to assessing and reporting on its financed carbon footprint this year. Its system is designed to align with the multilateral development banks' (MDBs) joint approach to reporting climate results.

Some eligible projects could be linked to fossil fuels, particularly in areas where lower-carbon alternatives are not feasible or where the social benefit is the central focus. That said, eligible projects cannot be primarily powered by fossil fuels and must use low-carbon energy sources.

Assets used to back eligible sukuk structures may not necessarily be green or social in nature, unlike the allocated projects. We understand that the issuer will, on a best effort basis, ensure assets meet the framework's eligibility criteria. However, these could potentially include non-green assets.

Shades of Green Projects – Assessment Summary

| | | |
|---|-----------------------|---|
| Sustainable water and wastewater management | Medium green |  |
| Renewable energy | Dark green |  |
| Clean transportation | Dark to medium green |  |
| Energy efficiency | Light green |  |
| Pollution prevention and control | Medium to light green |  |
| Environmentally sustainable management of natural living resources and land use | Medium to light green |  |
| Climate change adaptation | Dark to medium green |  |

Issuer and Context Analysis

"IsDB's eligible project categories aim to address the bank's most material sustainability factors and support its role in the sustainable development of its member countries. The eligible projects will seek to generate co-benefits by promoting green growth and social inclusion."

"IsDB plays an important role in developing Islamic finance markets, and it is one of the largest and highly rated issuers of Sharia-compliant instruments in the world."

"All IsDB's investments are subject to environmental and social due diligence."

Conservative Risk Management

Risk Management Controls

- Exposure limits are determined by the Risk Management Department
- The Treasury Department and the business units each have risk management functions that manage and control the exposures in the respective businesses

Credit Risk

- Preferred creditor status on sovereign financing:
 - 96.2% of all financing, excluding equity investments, is sovereign guaranteed
 - Remaining exposure to public private partnerships typically with elements of sovereign support
- Exposure to member countries is diversified with a view to avoid excessive concentration of risk. IsDB has established exposure limits for each country.

Liquidity Risk

- Conservative approach to liquidity management; IsDB maintains sufficient liquidity levels to fulfill all commitments for a period of 24 months under a normal market scenario and 12 months under stress scenario
- IsDB's policy with regards to liquidity management requires IsDB to hold substantial liquid assets, which include cash, cash equivalents, commodity Murabaha placements and Murabaha financing with short-term maturity of 3-12 months

Currency Risk

- Investment portfolio is held in currencies in line with the Islamic Dinar (ID)¹ basket currency which provides a natural currency hedge (consists of US\$: 43.38%, EUR: 29.31%, GBP: 7.44%, JPY: 7.59%, RMB: 12.28% as of December 31, 2024)
- All of IsDB's financing operations are denominated in the component currencies of ID. IsDB does not trade in currencies

Interest Rate Risk

- IsDB endeavors to minimise rate mismatches in liabilities and financing portfolio
- IsDB utilises Shariah-compatible hedging to mitigate any mismatches

1. IsDB's unit of account is as follows: 1 Islamic Dinar = 1 Special Drawing Right of the IMF. Exchange rate of 1ID=US\$1.30413 for the year ended 31 December 2024

Prudent Investment Management of Treasury Portfolio

Treasury Department manages more than US\$ 13.6 bn of Funds

Source: 2020-2024 Financial Statements

1. Money Market Placements = Commodity Murabaha Placements + Wakala + Cash and Cash Equivalents

2. Short-Term Trade Financing = Murabaha Financing with maturities of <6 months

A Money Market Placements¹

- Money market placements comprise about 54.7% of total treasury investment portfolio:
 - Minimum rating of single 'A' for non-member country FIs
 - For placements with member country FIs, a substantial majority of exposure (as close to 100% as possible) is to institutions rated "BBB+" or higher
 - Conservative country and entity limits

B Marketable Securities

- Conservative approach to investments in marketable securities to better manage overall portfolio risk:
 - Investment grade for corporate papers
 - Selective approach for sovereign investments
 - Total size not to exceed 10% of total issuance

C Short Term Trade Financing²

- Similarly, IsDB maintains a prudent strategy for its short-term trade financing portfolio:
 - Mainly focused on member countries
 - Non-member countries are required to provide sovereign guarantees in order to avail trade financing
 - Total size of Murabaha financing does not exceed US\$ 1.0 bn

Islamic Development Bank (IsDB) External Review of 2019 Green Sukuk Reporting

December 22, 2020

CICERO Green has reviewed IsDB's 2019 Green Sukuk reporting. We review project allocation against framework criteria and impact metrics for relevance and transparency.

CICERO Green finds no discrepancies in our review of the reporting against the IsDB Sustainable Finance Framework. The impact indicators reported are relevant for the project categories and provide investors with good information on the expected or actual environmental impact of projects financed. The reporting is aligned with the principles and recommendations for green bond reporting included in the ICMA Handbook, Harmonized Framework for Impact Reporting.
